04. TYPOGRAPHY

Futura Std

The Futura font is one of the most famous geometric fonts, and is still popular for daily use.

The font uses basic geometric forms and even-width strokes that eliminate any type of contrast. Lowercase letters like the 'a' are the exception when it comes to the even width. Ascenders and descenders in the lowercase letters are tall and go over the height of uppercase characters. This makes the font look elegant and sets it apart from other geometric fonts.
